Sigma Overview

System Summary:

Sigma detected: Add file from suspicious location to autostart registry

Signature Overview

Click to jump to signature section

AV Detection:

Antivirus / Scanner detection for submitted sample
Antivirus detection for dropped file
Multi AV Scanner detection for dropped file
Multi AV Scanner detection for submitted file
Yara detected FormBook
Machine Learning detection for dropped file

Key, Mouse, Clipboard, Microphone and Screen Capturing:

Yara detected Ursnif
Contains functionality to log keystrokes (.Net Source)

E-Banking Fraud:

Yara detected Ursnif

Yara detected FormBook

Spam, unwanted Advertisements and Ransom Demands:

Yara detected Wadhrama Ransomware

System Summary:

Malicious sample detected (through community Yara rule)

.NET source code contains very large array initializations

Writes registry values via WMI

Data Obfuscation:

Detected unpacking (changes PE section rights)

Detected unpacking (overwrites its own PE header)

.NET source code contains potential unpacker

Yara detected Allatori_JAR_Obfuscator

Boot Survival:

Creates an autostart registry key pointing to binary in C:\Windows

Creates autostart registry keys with suspicious names

Creates autostart registry keys with suspicious values (likely registry only malware)

Creates multiple autostart registry keys

Drops PE files to the startup folder

Hooking and other Techniques for Hiding and Protection:

Yara detected Ursnif

Creates files in the recycle bin to hide itself

Hides that the sample has been downloaded from the Internet (zone.identifier)

Malware Analysis System Evasion:

Contains functionality to detect sleep reduction / modifications

Tries to detect Any.run

Tries to detect sandboxes and other dynamic analysis tools (process name or module or function)

Tries to detect virtualization through RDTSC time measurements

Anti Debugging:

Contains functionality to hide a thread from the debugger

HIPS / PFW / Operating System Protection Evasion:

Modifies the context of a thread in another process (thread injection)

Stealing of Sensitive Information:

Yara detected Ursnif

Yara detected AgentTesla

Remote Access Functionality:

Yara detected Ursnif

Yara detected AgentTesla

Yara detected FormBook

Preview:	---.section: cli-commands .title: npm-fund..description: Retrieve funding information.....# npm-fund(1)....## Retrieve funding information.....## Synopsis.....``bash..npm fund [<pkg>].``.....### Description....This command retrieves information on how to fund the dependencies of..a given project. If no package name is provided, it will list all..dependencies that are looking for funding in a tree-structure in which..are listed the type of funding and the url to visit. If a package name..is provided then it tries to open its funding url using the `--browser`..config param; if there are multiple funding sources for the package, the..user will be instructed to pass the `--which` command to disambiguate.....The list will avoid duplicated entries and will stack all packages..that share the same type/url as a single entry. Given this nature the..list is not going to have the same shape of the output from `npm ls`.....### Configuration.....#### browser....* Default: OS X: `open`,
