## Sigma Overview

No Sigma rule has matched

## Signature Overview

- Compliance
- Software Vulnerabilities
- Networking
- System Summary
- Data Obfuscation
- Persistence and Installation Behavior
- Boot Survival
- Hooking and other Techniques for Hiding and Protection
- Malware Analysis System Evasion
- Anti Debugging
- HIPS / PFW / Operating System Protection Evasion
- Language, Device and Operating System Detection
- Stealing of Sensitive Information
- Remote Access Functionality

Click to jump to signature section

### Compliance:

Uses new MSVCR DLLs

Uses secure TLS version for HTTPS connections

### Software Vulnerabilities:

Exploit detected, runtime environment starts unknown processes

### Networking:

Connects to a pastebin service (likely for C&C)

Uses dynamic DNS services

### Data Obfuscation:

Yara detected Allatori\_JAR\_Obfuscator

### Persistence and Installation Behavior:

Exploit detected, runtime environment dropped PE file

### Boot Survival:

Creates autostart registry keys to launch java

Creates multiple autostart registry keys

Uses schtasks.exe or at.exe to add and modify task schedules

### Stealing of Sensitive Information:

Yara detected STRRAT

### Remote Access Functionality:

Yara detected STRRAT

## Mitre Att&ck Matrix

| Initial Access                      | Execution                                  | Persistence                                     | Privilege Escalation                            | Defense Evasion                             | Credential Access         | Discovery                               | Lateral Movement                   | Collection                     | Exfiltration                           | Command and Control                     | Network Effects                     |
