Analysis Advice

Sample drops PE files which have not been started, submit dropped PE samples for a secondary analysis to Joe Sandbox

Sample may offer command line options, please run it with the 'Execute binary with arguments' cookbook (it's possible that the command line switches require additional characters like: "-", "/", "--")

Sample searches for specific file, try point organization specific fake files to the analysis machine

Sample tries to load a library which is not present or installed on the analysis machine, adding the library might reveal more behavior

Compliance:

Uses 32bit PE files

Creates license or readme file

Binary contains paths to debug symbols

Persistence and Installation Behavior:

Sample is not signed and drops a device driver

Hooking and other Techniques for Hiding and Protection:

May use the Tor software to hide its network traffic
